The following is an examiner's statement of reasons for allowance: The prior art of record does not teach a process for preparing a purified LH-RH derivative which comprises the steps of contacting a solution containing the LH-RH derivative with a methacrylic synthetic adsorption resin; and contacting the solution containing the LH-RH derivative with an aromatic synthetic adsorption resin, thereby preparing a purified LH-RH derivative. Hatanaka et al. (U.S. 6,211,333 B1; previously cited) describes the method of producing leuporelin, but does not describe the use of a methacrylic synthetic adsorption resin and an aromatic adsorption resins as is currently being claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
